EDUPRO | EXECUTIVE SUMMARY

Instructor Performance & Course Quality

Purpose

Build a data-driven baseline for instructor effectiveness, course quality and teaching performance.

Measure	Result
Users	3,000
Instructors	60
Courses	60
Transactions	10,000
Average teacher rating	3.12/5
Average course rating	3.10/5
Average experience	6.3 years

Key signals

• Experience vs teacher rating: r = 0.60.
• Teacher rating vs transaction count: r = 0.32.
• Average teacher rating: 3.12/5.
• Average course rating: 3.10/5.

Priority decisions

1. Collect instructor-specific learner feedback.
2. Build a balanced instructor scorecard.
3. Audit low-rated courses and provide targeted support.
4. Normalize enrollment by exposure, price and availability.
5. Monitor results quarterly.

Decision caution

Use this analysis as a diagnostic baseline, not a punitive ranking. Correlations do not prove causation, and course-level ratings are not individual teacher ratings.
